

The PhysioMRI Management, chaired by the CEO, has decided to promote and disseminate at all levels of the company an Integrated Quality Policy that is the guide to achieving our vision:

"Deploy our resonances in all primary care centers, small clinics and sports rehabilitation centers around the world"

To achieve this, PhysioMRI commits to:

- Encourage innovation in design, technology and processes to keep us as a benchmark in the medical device industry.
- Maintain the Management System searching the continuous improvement and path towards excellence as the backbone of our activities with the aim of maintaining the loyalty and satisfaction of our customers.
- Comply with all legal and regulatory requirements related to the manufacture and supply of medical magnetic resonance devices.
- Ensure that subcontracts performed and materials used in their processes meet the necessary quality requirements, as well as, the continuous supervision to ensure compliance with this policy both in quality and in industrial safety.
- Train and empower our team to be experts in their roles and responsibilities by fostering an environment of continuous learning and growth, which contributes directly to the quality of our products.
- Identify, reduce, mitigate or transfer potential risks by establishing prevention and monitoring programs.
- Develop its activities within an environment-friendly environment, under the principles of pollution prevention, reduction and recycling of waste, saving raw materials, energy and water.
- Review this policy to adapt it to the new requirements and make it available to any company or institution or interested party requesting it.

The PhysioMRI Management signs this policy and undertakes to maintain and extend the contents of this policy to the general public.
